

Team Charter – Team 12

DECO3500 Social & Mobile Computing — Assignment 2: Design Proposal

1. Team Details

Field	Details
Project Title	Preserving memories to support relationships, encouraging social interaction through nostalgia and reminiscence.
Team Name	NO_PARKING(!)
GitHub Repository URL	https://github.com/batinion/DECO3500
Team Lead	Dev Kansana
Primary Team Spokesperson	Vim Mahakumbura

2. Team Members

Duties are assigned to stretch each member beyond their existing strengths, not just play to them, per the assignment brief.

Name (preferred name)	Program of Study	Email	Assigned Duties
Shirish	Master of Interaction Design	S4974055@student.uq.edu.au	Research Lead — owns domain/stakeholder research and evidence gathering; supports concept sketching. Stretch duty: User Testing Coordinator — plans and runs user testing/interview sessions (pushes beyond research into facilitation).
Dattatray	Master of Interaction Design	d.siraskar@student.uq.edu.au	Strategy & Market Fit Lead — grounds the concept in real-world viability and competitor critique. Stretch duty: Documentation & GitHub Project Management — maintains the repo, issues and task board (pushes beyond strategy into ops/coordination).
Dong	Master of Information Technology	d.n.nguyen@student.uq.edu.au	Technical & Data Lead — handles prototype build, data handling and technical feasibility. Stretch duty: Co-facilitates user research sessions alongside Shirish (pushes beyond dev/data into direct user-facing research).
Dev	Master of Interaction Design	d.kansana@student.uq.edu.au	Research and Design coordination Stretch duty: Contributes directly to prototype build alongside everyone
Vim	Master of Information Technology	v.mahakumbura@student.uq.edu.au	Design Lead — owns concept design, UX and visual direction. Stretch duty: Presentation & Slide Design Owner, plus mentors Shirish on clean UI practice (pushes beyond individual design work into teaching/critique).

Personal Aims & Goals

Each member's own statement of what they personally want to get out of this project — not a restatement of skills or duties.

Shirish: I want to learn about certain topics without running for the solutions first as that's the usual way around that I have experienced in other courses, and understand the impact of social and mobile nature of technologies

Dattatray: My goal is to apply in-depth market research and critical thinking to identify core problem statements and design user-friendly, scalable solutions that enhance social and collaborative experiences in mobile computing.

Dong: I want to get comfortable designing something as part of a group, where the final idea is genuinely better because it wasn't just my own.

Dev: Unlearning Design approach, understand and learning design communications through different group exercise.

Vim: Apply social concepts in mobile systems design and explore the boundaries of the digital social designing.

Reference: Individual Strengths (informing duty assignments above)

Shirish: Legal research background, media design, sketching, well-travelled, strong listener.

Dattatray: Business analysis, go-to-market strategy, critical thinking, collaborator, socially active.

Dong: Data analyst, visual interpreter, strong listener, developer.

Vim: Requirements gathering/analysis, empathetic and human-centred, creative.

Dev: Design expert, human-centred designer, researcher/ideator.

3. Communication Plan

Item	Plan
Main channel	MS Teams
Backup channel	Outlook emails. Phone calls.
Expected response time	Within 12 hours
Regular meetings	Every Sunday 3pm
Decision-making	Team discusses and aims for consensus; where consensus isn't reached within a set time, consult tutors.
GitHub workflow	Issues used for all tasks in Github Project board, assigned to an owner with a due date; board reviewed at each meeting; PRs/commits reference issue numbers — confirm as a team

4. Conflict Resolution Plan

What counts as a conflict for this team:

- Missed responses beyond the agreed response time without notice.
- Work that falls noticeably short of what was agreed (scope, quality or deadline).
- Repeated late delivery of assigned tasks without communication.
- Disagreement on project direction or decisions that can't be resolved through normal discussion.

How issues are raised:

- Raise it directly and privately with the person first, as soon as it's noticed.
- If unresolved within 3 days, raise it at the next team meeting for open discussion.
- Agreements or changes made as a result are logged in GitHub (issue or shared notes) so there's a record.

If it can't be resolved internally:

- The team first tries a structured mediation step: each person states their view uninterrupted, then the team looks for a compromise.
- If still unresolved after this, the team agrees to consult course staff together, rather than one member escalating unilaterally.
- Any staff escalation is communicated to the whole team beforehand — no one is blindsided.

5. Agreement & Signatures

By signing below, each team member confirms they have read, understood, and agree to this Team Charter as the working agreement for this project.

Name	Signature	Date
Shirish Kamble		26/08/26
Dattatray Sirasbar		26/08/26
Dong Nguyen		25/08/26
Vim Mahakumbura		25/08/2026
Dev Kansana	Dev Kansana 	25/08/2026
